

EGURA

Golden Partners

Freshwater, renewable energy, green hydrogen and shared value — produced from seawater or wastewater, powered only by sun and wind, in tropical and subtropical latitudes.

You don't need capital. You need **your name, your network, and two minutes to explain it.**

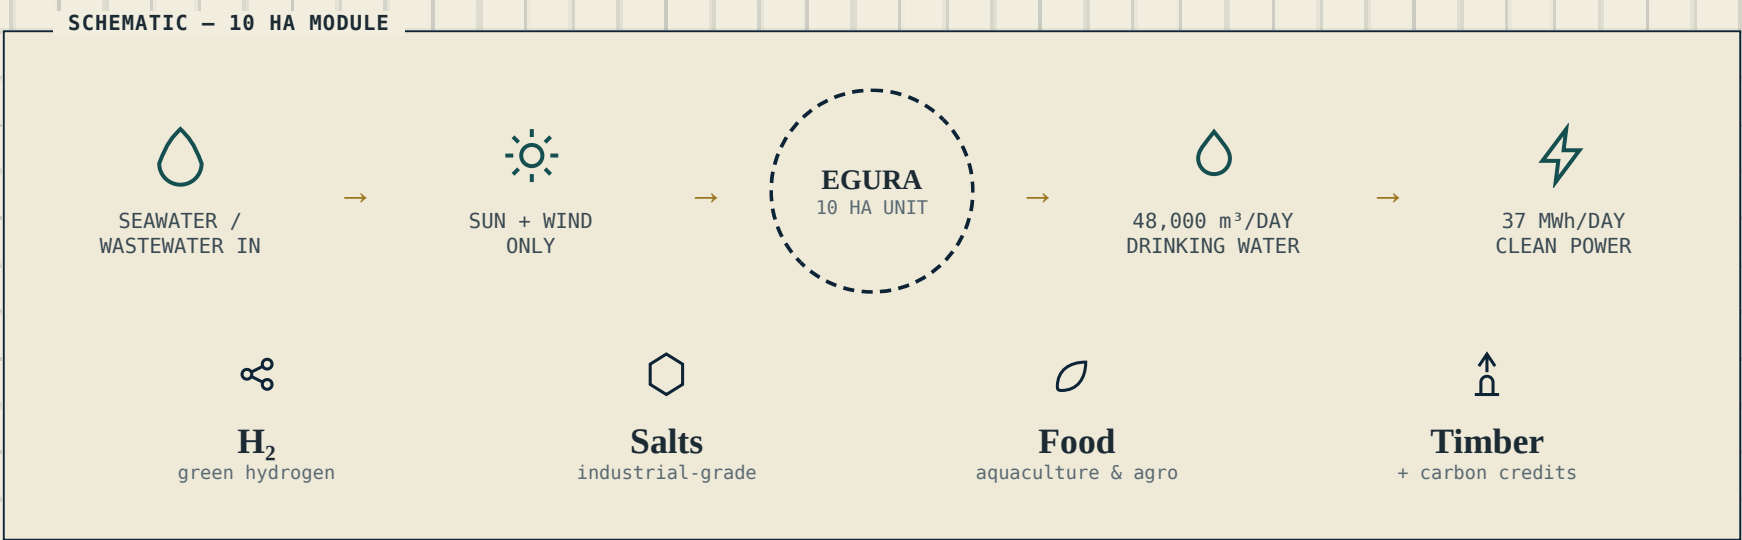

SEC.01 The project

Egura is a global initiative, more than ten years in the making, that turns seawater or wastewater into drinking water and clean power — with no fuel but the sun and the wind. Three private, transcontinental companies are being formed to build it, continent by continent.

SEC.02 The plant

Each Egura unit sits on 10 hectares, preferably beside a coastal refinery. Sun and wind run the desalination and power systems; the plant returns far more than water and electricity.

SEC.03 The economics

Projected figures per plant, at full optimal operation — the numbers that make the case to a Silver Partner.

\$40M CAPITAL COST PER PLANT	\$17–18M AVERAGE EBITDA / YEAR	~\$12M ESTIMATED NET PROFIT / YEAR	3–4 yrs CAPITAL PAYBACK PERIOD
--	--	--	--

Figures are indicative projections for a single 10-hectare unit at full optimal operation, not a guarantee of return.

SEC.04 The Golden Partner

You put in ~~no money~~ — you put in **your time, your effort, and your network.**

WHO	Friends, family and trusted local leaders — one per municipality, city or region.
HOW MANY	100 Golden Partners per company — 300 across all three continents.
MISSION	Activate your own network to identify and attract Silver Partners, and help the first pilot plant reach its funding target.
TARGET	An indicative \$400,000 raised toward each pilot plant.

0.07%

OWNERSHIP OF THE COMPANY

Equity in the whole Egura company you join — not only the plants — for every one of the 100 Golden Partners.

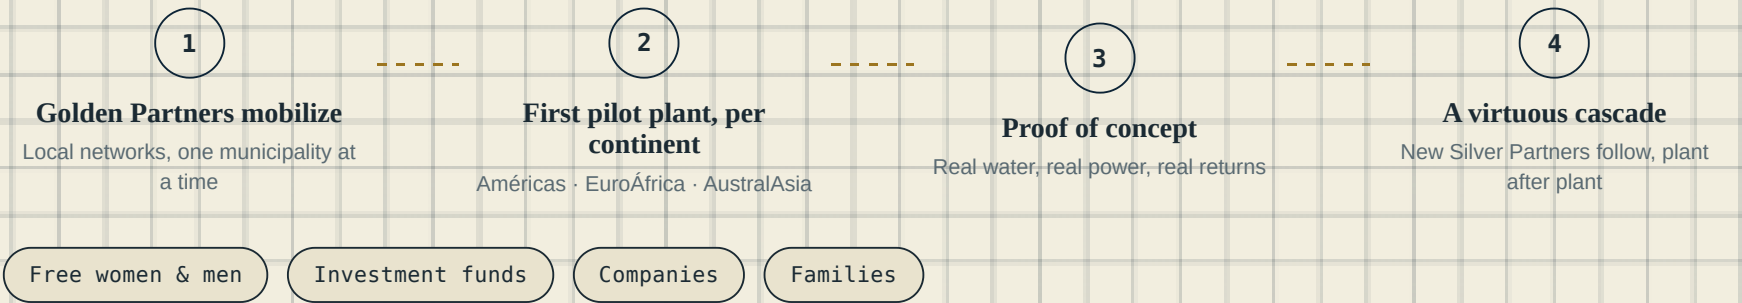

SEC.05 The Silver Partner

The people your network brings to the table. This is who you'll be introducing.

Up to \$400K Invested per Silver Partner, per plant.	90% Ownership of that plant, held by the Silver Partner.	3–4 yrs The 10% differential (Golden + 3% LEA Foundation) is returned early, accelerating capital recovery.
--	--	---

SEC.06 The cascade

One proven plant per continent is the whole strategy. After that, momentum does the recruiting.

Join as a Golden Partner

Activate your network, one municipality at a time — and hold a stake in the company from day one.

Easy water + Easy energy + Shared value for the Americas, EuroAfrica & AustralAsia
